

Project Initialization and Planning Phase

Date	7 October 2026
Team ID	N/A
Project Title	Food Analysis: Cuisine Demand & Order Trends Analysis
Maximum Marks	3 Marks

Project Proposal (Proposed Solution) template

This project proposal outlines a solution to address a specific problem. With a clear objective, defined scope, and a concise problem statement, the proposed solution details the approach, key features, and resource requirements, including hardware, software, and personnel.

Project Overview	
Objective	Analyse cuisine demand and order trends and present them in an interactive Tableau dashboard.
Scope	Order data analysis, visualisations, dashboard, story and web integration.
Problem Statement	
Description	Demand patterns across cuisines and over time are not visible in raw order data.
Impact	Clear demand insight supports menu planning, promotions and inventory decisions.
Proposed Solution	
Approach	Prepare the data, build calculated fields and charts in Tableau, combine them into a dashboard and story, and publish on Tableau Public.
Key Features	Interactive filters, cuisine and order trend views, a storytelling sequence, and a responsive web page that embeds the dashboard.

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	Laptop or desktop	ASUS Vivobook 16
Memory	RAM	16 GB
Storage	Disk space for data and workbooks	512 GB SSD
Software		
Frameworks	Web and analytics tools	Tableau Desktop / Tableau Public, Bootstrap (LeadPage template)
Libraries	Additional libraries	Tableau Embedding API v3 (JavaScript)
Development Environment	IDE, version control	VS Code, Git
Data		
Data	Source, size, format	dataset name and source, number of rows, file format
