

Business Question and Visualization Report

Date	3 October 2026
Team ID	N/A
Project Name	Food Analysis: Cuisine Demand & Order Trends Analysis
Maximum Marks	5 Marks

Visualization development refers to the process of creating graphical representations of data to facilitate understanding, analysis, and decision-making. The goal is to transform complex datasets into visual formats that are easy to interpret, enabling users to gain insights and make informed decisions. Visualization development involves selecting appropriate visual elements, designing layouts, and using interactive features to enhance the user experience. This process is commonly associated with data visualization tools and platforms, and it plays a crucial role in business intelligence, analytics, and reporting.

Business Questions and Visualisation

The process involves defining specific business questions to guide the creation of meaningful and actionable visualizations in Tableau. Well-framed questions help in identifying key metrics, selecting relevant data, and building visualisation that provide insights.

1. Which cuisines receive the most orders?

- *Visualization: Bar chart of orders by cuisine*

2. Which cuisines generate the most revenue?

- *Visualization: Bar chart of revenue by cuisine*

3. How do orders change month by month?

- Visualization: Line chart of monthly orders

4. Which days of the week or hours are busiest?

- Visualization: Heat map of orders by day and hour

5. What is the average order value for each cuisine?

- Visualization: Bar chart of average order value by cuisine

6. How does each cuisine share the total orders?

- Visualization: Pie chart or treemap of order share

7. Which locations place the most orders?

- Visualization: Map or bar chart by location

8. How do customer segments differ in their cuisine choices?

○ *Visualization: Stacked bar chart by segment*
